Hi Louis,

The new area for mining is big enough that we will need to receive cultural resource clearance of the new area before we can approve the amendment. Hopefully the new area was also cleared by the NCRS, but I don't have the map that the NCRS used for their survey, and so I don't know if the past letter from before covers it or not. So we'll need a map and/or a letter from the NCRS indicating that it's been cleared. I hope this doesn't stall things for long.

Also, please send us a replacement map representing your proposed amendment that can be inserted into the original NOI in place of the currently approved map. Your revised map (with a scale, legend, etc) should show the new areas of disturbance, but not the currently-approved lighter purple boundary in the map sent today.

Indicate where you have mined to date (a good approximation is fine). This map will be used to replace (not supplement) the currently-approved operation map in the NOI. The acreage should still be less than. A scan of your approved NOI with the maps is attached.

If the Esplins are still the land owners, then you won't need to send in a page 3. I assume that page 4 doesn't need to change either, but you will know better than I.

If you want, you can email the revised map and any NCRS documentation, together with a scan of the following form (https://fs.ogm.utah.gov/pub/mines/minerals_related/forms/MR-REV-SMO_EXP.pdf), signed by you, that identifies which pages or maps you want to replace. Or you can mail us hardcopies.

Let me know how you think I can help.

Peter

Once we have started mining the rock we discovered the far south end of the site was lacking the depth of rock needed for the project. We are not utilizing a section of land which was for stockpiling rock and top soil and we would like to not use this area depicted on the map for the additional rock mining area a little north of our original site location. The acreage works out to be very similar and I just wanted to make sure we are OK to deviate from our original plan which was compiled from visual and not actual mining of the rock.

I have reviewed this with the land owner and they are cattle people and are good with the removal of more cedar trees and rocks which will be reclaimed as a seeded area.
Kane Permit # S/0 25/0035

Thanks
Louis Pratt
